

FX-6 Billboard Printing instructions

The Hughes Outdoor FX-6 Panel is different than a traditional “wrapped” vinyl.

The printed vinyl is not wrapped around the billboard face, but attached under a 2” stainless steel trim border.

For this reason, the overall size of the finished vinyl is extremely important. The overall finished size should be 10’-7” x 22’-10” including the pockets. If this size is exceeded, the vinyl will be too large for the panel and cannot be fully tightened.

Tell your printer that the finished vinyl should be 10’-7” x 22’-10” with 3” live- bleed pockets.

If there are any questions please have the printer call Steve Hughes at 804-784-0501 or e-mail to steve@hughesoutdoor.com.
